Colby Fire Impact Area **GREEN LEVEL** Flooding Protocol in Effect

On 4/2/2014, the City of Glendora has declared the following **GREEN LEVEL** emergency protocol in effect for the Colby Fire Burn Impact Area. The recent storm has passed this area and the alert level was updated to green from yellow due to the weather and the field conditions within the foothills of Glendora. The city, in cooperation with its partner agencies, will continue to monitor the weather conditions and will modify the alert as appropriate.

The **GREEN LEVEL** protocol includes:

- ***NO evacuation** orders in effect
- ***NO** rain-related parking restrictions in effect
- *Residents encouraged to monitor weather conditions and be alert to changes
- ***No restricted entry**

The Colby Fire Burn Impact Area includes all properties north of Sierra Madre between the western city boundaries of Azusa/Glendora (Yucca Ridge) to the eastern boundary of properties on the west side of the Little Dalton Wash (near Loraine Ave.). These areas have the highest risk of being impacted by flooding/debris flows from rainfall due to the loss of vegetation from the foothills.
